-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 18 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Inaba et al.

Inaba et al disclose a polarization maintaining fiber comprising: air cladding (the air that surrounds the fiber); stress producing regions (23) within the fiber; and an additional cladding region (22).

The structure above reads on claims 18 and 19.

Claim 56 is rejected under 35 U.S.C. 102(b) as being anticipated by Berkey.

Berkey discloses a polarization maintaining fiber comprising: a fiber core (core in drawing) having a diameter greater than 15um; a first cladding surrounding the core (6) and further including stress producing regions therein (an inherent property of its asymmetrical shape); an air cladding (7) substantially surrounding the first cladding; and a third cladding (8) surrounding the air cladding.

The structure above reads on claim 56.

Claims 57-66 are rejected under 35 U.S.C. 102(e) as being anticipated by Kawanishi et al.

Kawanishi et al disclose a polarization maintaining fiber comprising: a fiber core (71); a cladding region (72) disposed about the core, the cladding region including a plurality of features (holes); a plurality of stress producing regions (b and c) located in the cladding region.

The structure above reads on claim 57.

Claims 58-61 read on the properties disclosed for region (72).

Claims 62-66 read on the structure applied to claims 57-61.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited show the level of skill in the art.
